

## Project 09 : Finite Element

### Description:

The purpose of this project is to analyze the root causes of the opening behavior not okay of the JLR Armrest based on simulation with the finite element methodology.

### Tasks:

- Analyze the current state.
- Modelisation.
- Finite element simulation.
- Define the critical parts.

### Profile:

Mechanical / Electronic Engineer.

### Required Skills:

English, MS office, Finite element.

### Number of Interns:

1 Intern.

### Duration:

4 Months.
